BROOKHAVEN NATIONAL LABORATORY

Data Usability Summary Report

Contract Laboratory: GEL Lab SDG No: 50979Analytical Fraction: H-3, Gross Alpha Analytical Method(s): EPA 906, 900Sample Ids: 075-85, 065-39, 076-10

Sample ID	Data Usability Qualifier	Explanation for qualifier.
075-85 065-39	N2 H-3 N2 H-3	The H-3 results were not distinguishable from background. The sum of the MDA and the 2-sigma error was greater than the reported activity.
076-10	N2 G. Beta ^{Alpha}	^{Alpha} Beta The Gross Beta results were not distinguishable from background. The sum of the MDA and the 2-sigma error was greater than the reported activity.

BROOKHAVEN NATIONAL LABORATORY**Data Usability Summary Report**Contract Laboratory: GEL Lab SDG No: 46973Analytical Fraction: VOCs Analytical Method(s): EPA 524.2Sample Ids: 121-16 (sampled 7/10/01), 122-13 (sampled 7/10/01), 122-12 (sampled 8/6/01), 122-30 (sampled 8/6/01)

Sample ID	Data Usability Qualifier	Explanation for qualifier.
121-16 (Sample Key 123289) and 122-13 (Sample Key 123292)		A review of the historical data, and nearby monitoring wells indicate that the results from these two wells were inadvertently switched with each other. It can not be determined if this switch occurred in the laboratory or the field but the results clearly indicate that they were switched. Therefore, the results in the database will be changed to indicate the correct sampling points.
122-12 (Sample Key 123558) and 122-30 (Sample Key 123559)		A review of the historical data, and nearby monitoring wells indicate that the results from these two wells were inadvertently switched with each other. It can not be determined if this switch occurred in the laboratory or the field but the results clearly indicate that they were switched. Therefore, the results in the database will be changed to indicate the correct sampling points.

Data Usability Summary Report

Contract Laboratory: GEL Lab SDG No: 44827 and 44882

Analytical Fraction: Pesticides Analytical Method(s): USEPA 608

Sample IDs: 086-72 Sampled 6/26/2001 and 106-02 sampled 6/27/02

<i>SAMPLE ID</i>	<i>DATA USABILITY QUALIFIERS</i>	<i>EXPLANATION FOR QUALIFIERS</i>
086-72 and 106-02	U	All pesticide hits were declared non-detect. Laboratory informed BNL that there was contamination from the laboratory control sample (LCS) solution. BNL believes that both samples 086-72 and 106-02 were affected.
087-09		It is possible that the 13 poly-aromatic hydrocarbon hits in sample 087-09 were also caused by a contamination from an LCS solution but this can not be confirmed.

Burke, John

From: Jannie Shaw-Busby [jls@mail.gel.com]
Sent: Friday, September 28, 2001 2:28 PM
To: Burke, John
Subject: SDG 44827 Data Review

Mr. Burke,

This email is in response to your request to confirm pesticide detects in sample 44827002 (BNL ID 10034-002). After a review of the raw data, it was concluded that the peaks labeled as target compounds were indeed very well defined peaks above the baseline on both columns. All quality control criteria were met for this SDG. However, this sample contained hits of all spiking compounds used in the Laboratory Control Sample (LCS) and the matrix QC (MS/MSD). It is also highly unusual for the same environmental sample to contain hits of all these compounds. Based on these facts, it is the opinion of the laboratory that the sample was contaminated during preparation. Since every hit is well below the reporting limit, the data should be qualified as non-detects.

If you have additional questions concerning this response or any other issue, please call me at (843) 556-8171 Extension 4287.
